

As founder of Field Verified, Brian Melcher has been instrumental in its rapid growth with projects in Arizona, California, Texas, Utah and Alaska. He began his construction industry career building custom homes and retail space in Southern California. After several years of hands-on experience, his career shifted to quality assurance inspection of residential and commercial buildings across the United States. For the last decade he has developed and directed quality assurance programs on more than 400 commercial projects and thousands of single-family homes. He has also developed these services to meet stringent building envelope commissioning requirements. Mr. Melcher is a LEED AP and a certified plans examiner for the 2012 International Energy Conservation Code (IECC). His experience includes forensic investigation of water intrusion issues and expert witness testimony on construction defect litigation.

Industry Experience

Mr. Melcher is a commercial and residential construction expert, specializing in building envelope and water intrusion issues. He led Field Verified in developing ISO-compliant testing procedures to become the first AAMA Accredited Field Testing Agency in the world. In 2018, Field Verified opened the first accredited mockup and window testing laboratory in the Mountain West. The Field Verified testing division performs curtain wall and window chamber testing on site and electronic testing of waterproofing and roof leak detection testing on projects across the country. Mr. Melcher currently serves on several technical committees for ASTM and the American Architectural Manufacturer's Association (AAMA).

ASTM

- E06 - Performance of Buildings-Main Committee
- E06.58 - Exterior Insulation and Finish Systems (EIFS)
- C24 -Building Sealants and Seals-Main Committee
- D08-Roofing and Waterproofing-Main Committee
- F13 Pedestrian/Walkway Safety and Footwear

AAMA

- AAMA 501.4 and 501.6 Seismic Test Update Task Group
- AAMA 508/509 Rain Screen Test Update Task Group
- Accredited Independent Laboratories Committee
- Curtain Wall Manual Update Task Group
- Exterior Sealant Long-Term Durability Work Group
- Sealant Application Guide (AAMA 851) Task Group
- Field Test and Forensic Investigation Document Update Task Group
- Test Method to Qualify Installation Procedures Update Task Group

Project Highlights

On each project, Mr. Melcher administered the construction quality assurance services, including direct inspection, construction document review, air and water performance testing, managing full time inspectors, and developing inspection standards.
